Prof skills Lec 4 – Motivation, Time Management & Goal Setting

1. Motivation

Definition:

Motivation is the process that starts with a need and drives a person to achieve a goal.

Motivation Process

1. Needs – Lack of something (food, rest, success)
2. Drives – Motivation to satisfy the need
3. Incentives – Reward or goal achieved

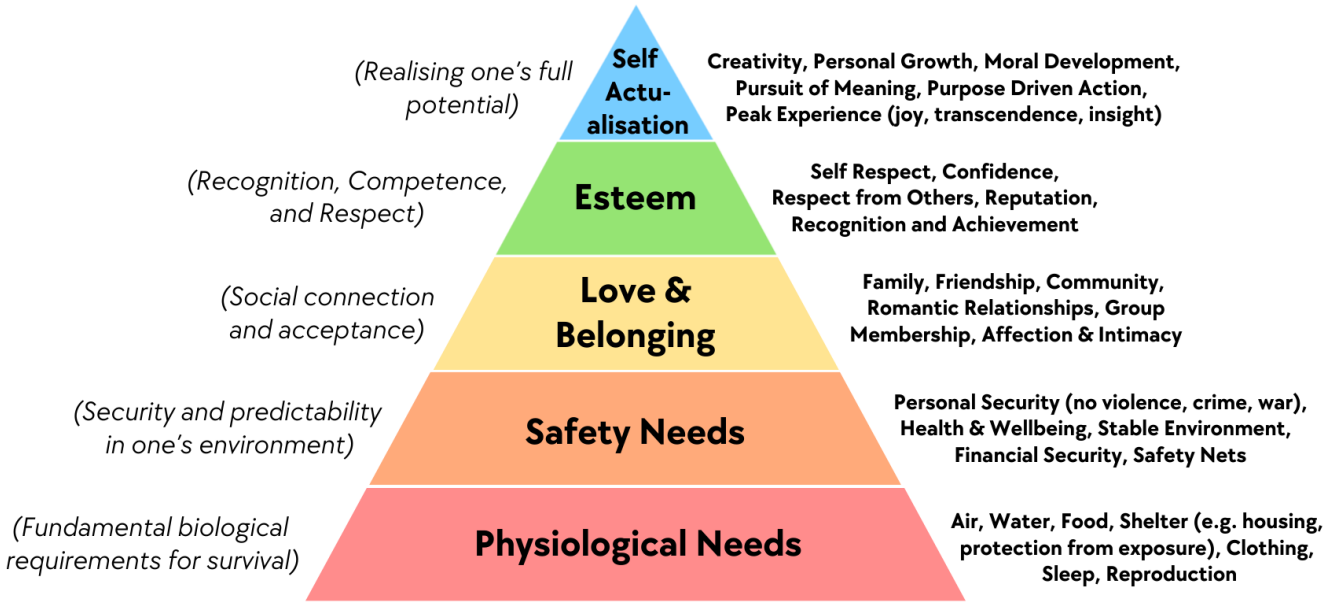
Example:

Need → Hunger

Drive → Desire to eat

Incentive → Food

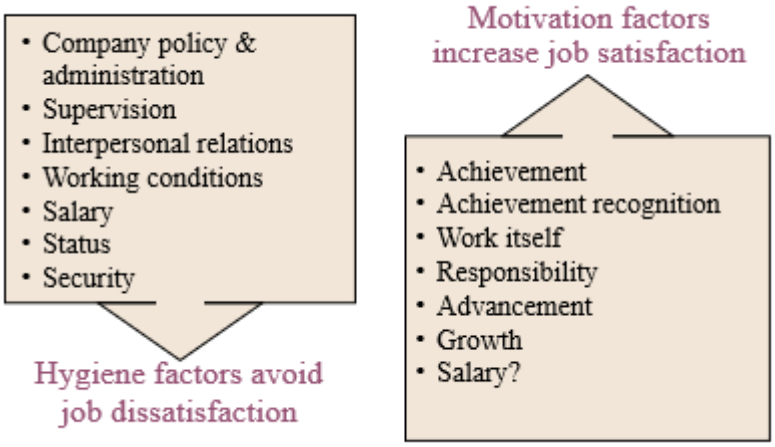
2. Maslow's Hierarchy of Needs



Level	Description
Self-Actualization	Achieving personal potential
Esteem Needs	Status, respect, recognition
Social Needs	Friendship and belonging
Security Needs	Safety, job security
Basic Needs	Food, water, shelter

People usually satisfy **lower needs first** before moving to higher needs.

3.Herzberg's Two-Factor Theory



Hygiene Factors

work condition related to dissatisfaction caused by discomfort or pain

- Work environment
- Salary
- Company policies
- Job security

They prevent dissatisfaction but do not strongly motivate people.

Motivation Factors

work condition related to the satisfaction of the need for psychological growth

- Achievement
- Recognition
- Responsibility
- Personal growth

These increase job satisfaction and performance

.

Motivation-Hygiene Combinations

	High M	Low M
High H	high motivation few complaints	low motivation few complaints
Low H	high motivation many complaints	low motivation many complaints

(Motivation = M, Hygiene = H)

High H + High M	**High H + Low M**	**Low H + High M**	**Low H + Low M**
High motivation, few complaints	Low motivation, few complaints	High motivation, many complaints	Low motivation, many complaints
Employees are happy and satisfied	Employees are not unhappy, but not motivated	Employees like the work but complain about conditions.	Employees are unhappy and unmotivated.
Example: Good salary + recognition = career growth	Example: Good salary but boring job with no growth.	Example: Interesting job but low salary or poor work environment.	Example: Low salary + boring job = bad working conditions.

4. Goal Setting

Goal setting means creating a plan to achieve something in the future.

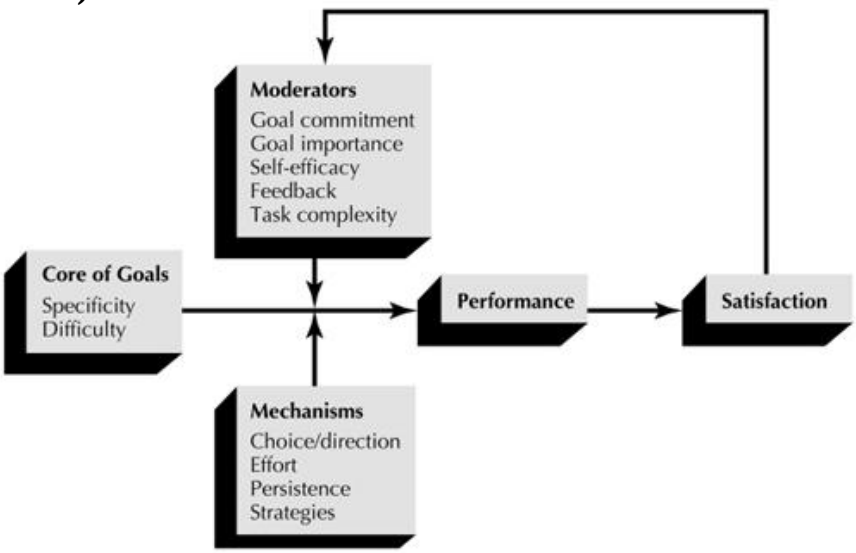
SMART Goal Characteristics

Letter	Meaning
S	Specific
M	Measurable
A	Achievable
R	Result-based
T	Time-specific

Example:

Goal: Improve programming
SMART Goal: Learn Java programming in 3 months by completing 2 projects.

5.Motivation Model for Relating Goals to Performance and Satisfaction (Locky and Latham model)



Step 1: Core of Goals

Specificity → Goals should be clear.

Difficulty → Goals should be challenging.

- <u>Clear and challenging goals help people focus.</u>

Step 2: Moderators (Things that influence the goal)

Goal commitment → How dedicated you are to the goal.

Goal importance → How important the goal is to you.

Self-efficacy → Belief that you can achieve it.

Feedback → Information about progress

Task complexity → How difficult the task is

- <u>These factors affect how well the goal works.</u>

Step 3: Mechanisms (How people work toward goals)

Choice / Direction → Focus on the right tasks

Persistence → Keep trying

Effort → Work harder

Strategies → Use good methods

- <u>These actions improve performance.</u>

Step 4: Performance

Better effort and focus lead to better performance.

Step 5: Satisfaction

Good performance leads to satisfaction and motivation.

5. Time Management

Time management means using your time effectively to complete tasks and achieve goals.

It helps to:

- Increase productivity
- Reduce stress
- Achieve goals faster

6. Preparation for Time Management - To manage time well you should maintain:

- Proper sleep
- Healthy food and water
- Exercise
- Organized environment
- Mindfulness and focus
-

7. Tracking Your Time - Track how you spend your weekly time.

Examples:

- Sleep hours
- Study hours
- Travel time
- Social activities
- Work hours

There are 168 hours in a week.
Tracking helps you see where your time goes.

8. Tools for Effective Time Management

1. To-Do List

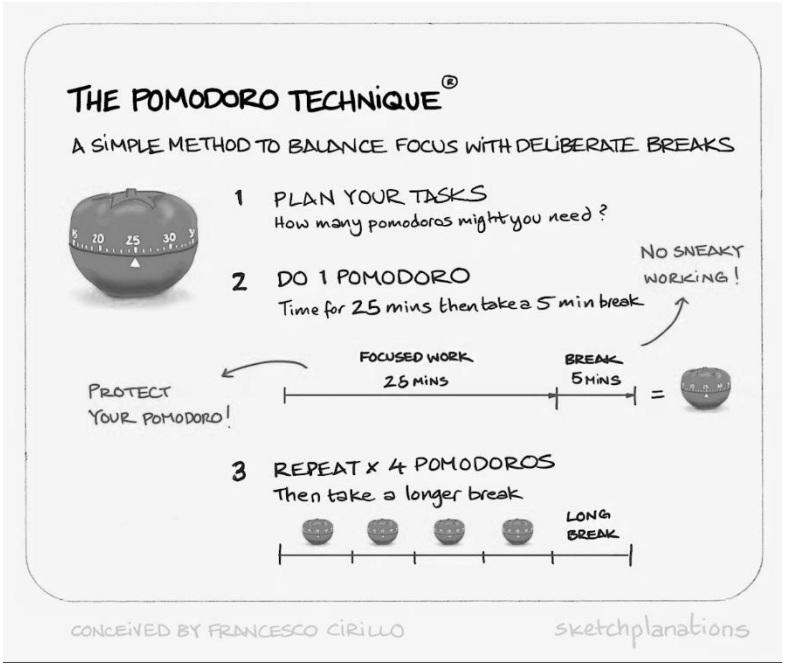
- Write tasks you must complete.
- Prioritize important tasks first.

2. Time Management Matrix

Category	Example
Urgent & Important	Deadlines
Important but Not Urgent	Studying, planning
Urgent but Not Important	Interruptions
Not Urgent & Not Important	Social media

Focus mainly on **important tasks**.

3. Pomodoro Technique



A popular time management method.

Steps:

1. Work **25 minutes**
2. Take **5 minute break**
3. Repeat 4 times
4. Take a **long break**

This improves **focus and productivity**.

9. Digital Wellbeing

Digital wellbeing tools help control phone usage and distractions.

Examples:

- App timers
- Screen time tracking
- Focus mode

This helps students reduce phone addiction and improve productivity.
